

Next-generation heater-purifier

Heatbit Maxi

<https://heatbit.com>

Welcome to Heatbit

Progress is inevitable. Everything around us is getting smarter.

Not just phones or cars, but homes, devices, and money.

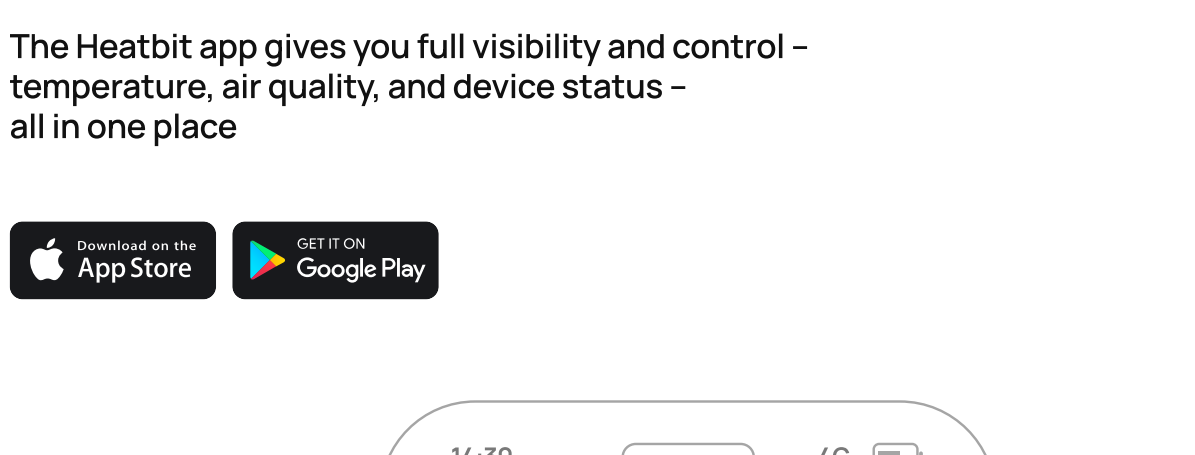

Old appliances stopped at a single function. Heatbit devices give you more – comfort, clean air, and Bitcoin earnings on autopilot.

We are your quiet partners in progress.

You are early. Thank you for that.

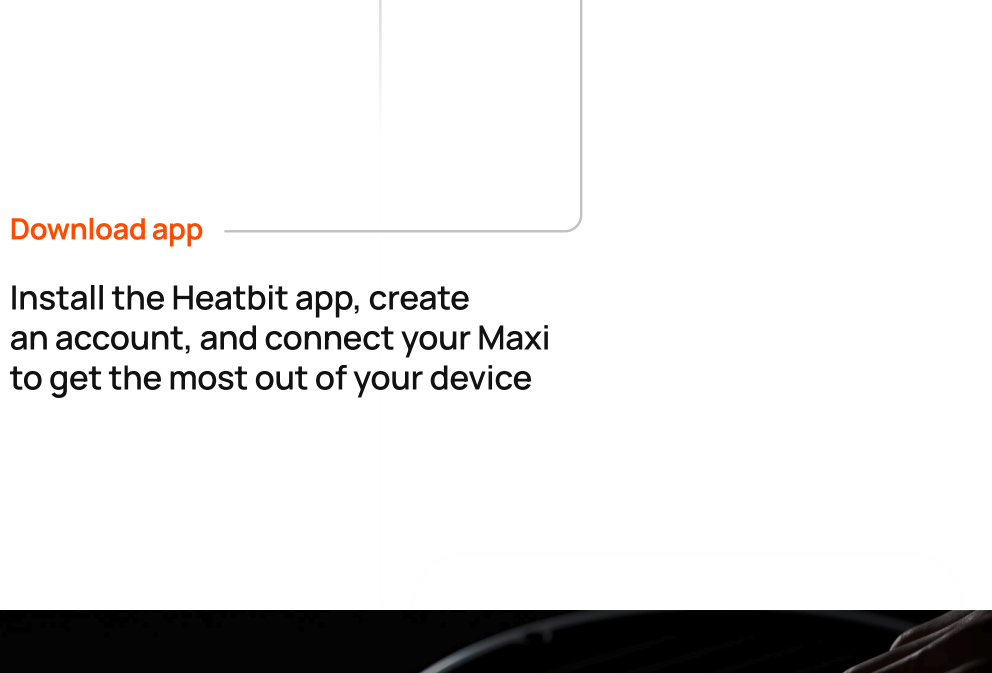

Getting started

Turn the device on

Connect the app

The Heatbit app gives you full visibility and control – temperature, air quality, and device status – all in one place

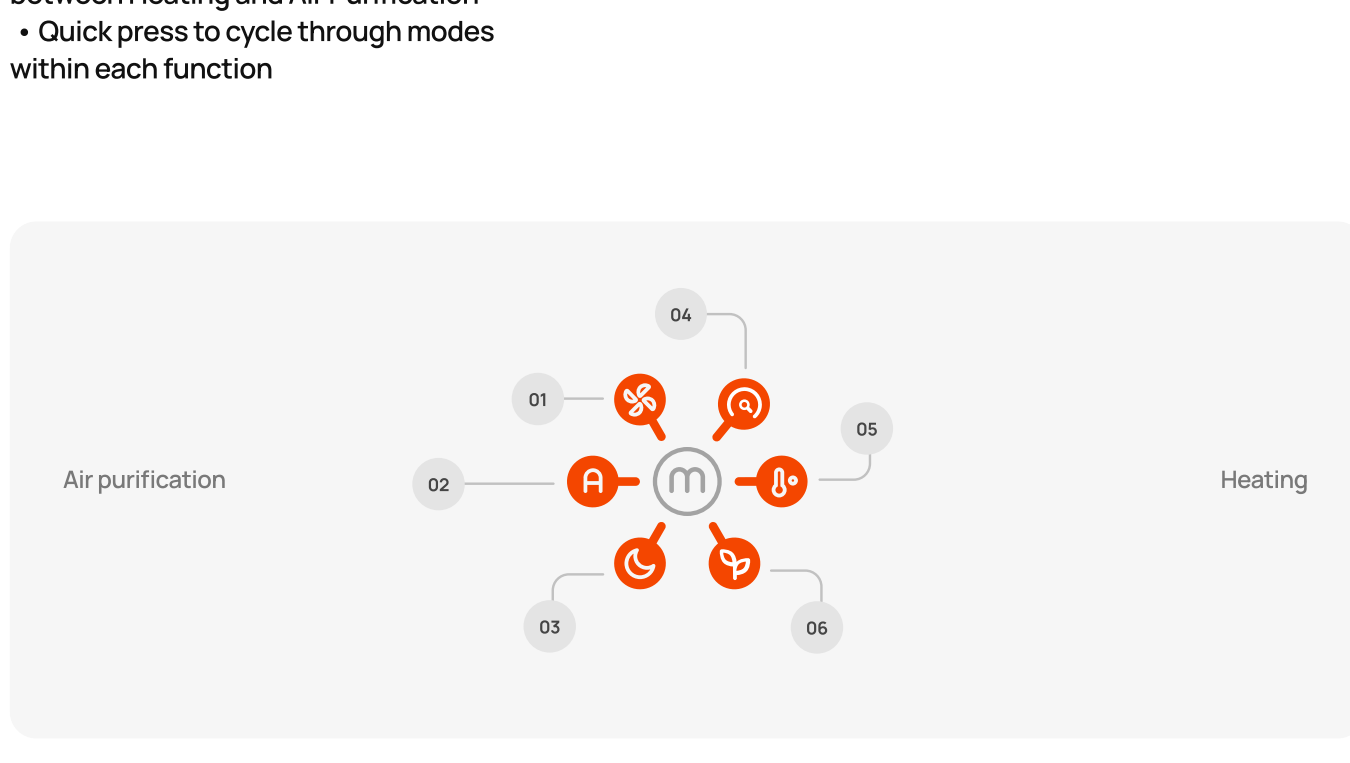

Install the Heatbit app, create an account, and connect your Maxi to get the most out of your device

Scan QR

Your Maxi is ready to perform

Controls

1. Standby

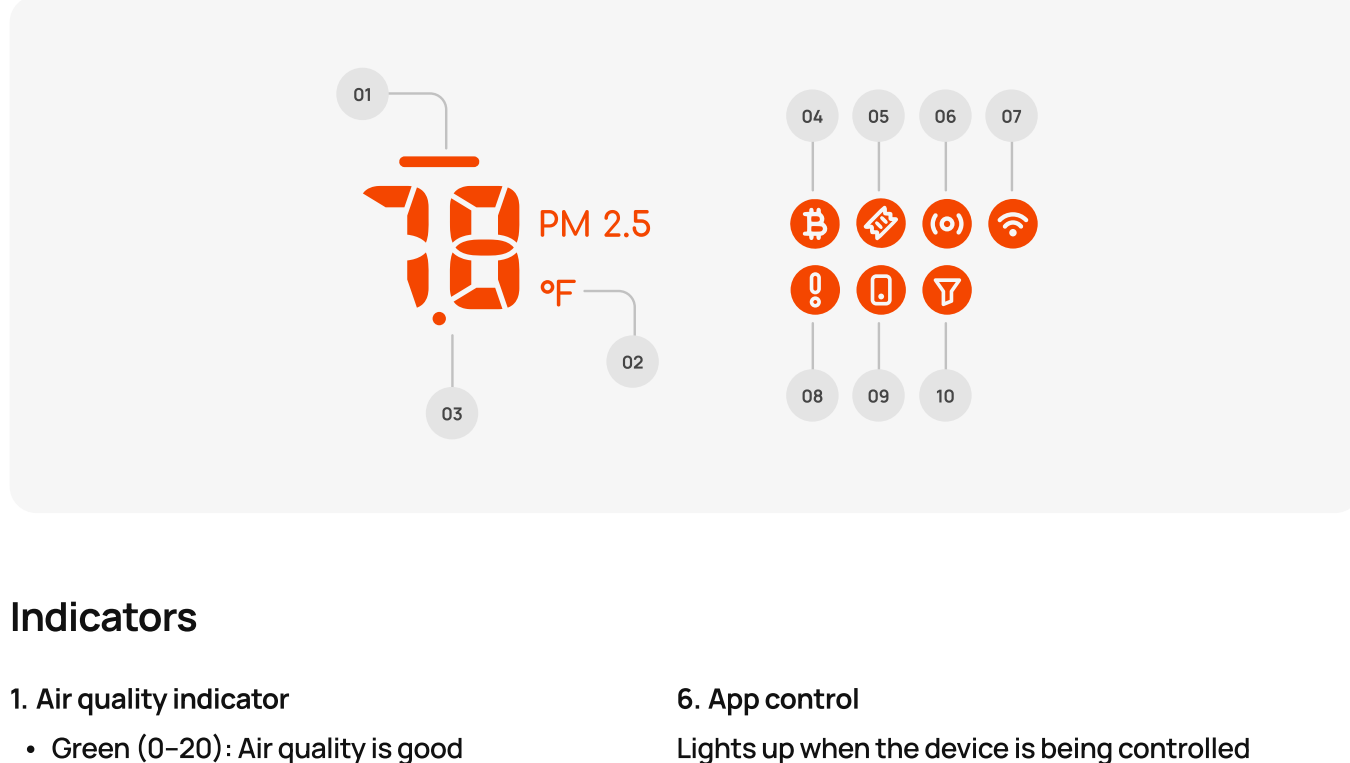

Quick press to turn Maxi on or off

2. Function & Mode Selector

- Press and hold for 3 seconds to switch between Heating and Air Purification
- Quick press to cycle through modes within each function

3. Temperature Adjustment

Use the “+/-” buttons when you want to set your desired temperature

Air purification modes

1. Turbo

Maximizes airflow to quickly address sudden changes in air quality

2. Auto

Continuously adjusts airflow based on real-time air quality readings

3. Light

Low, silent airflow for nighttime or background purification

Heating modes

4. Turbo

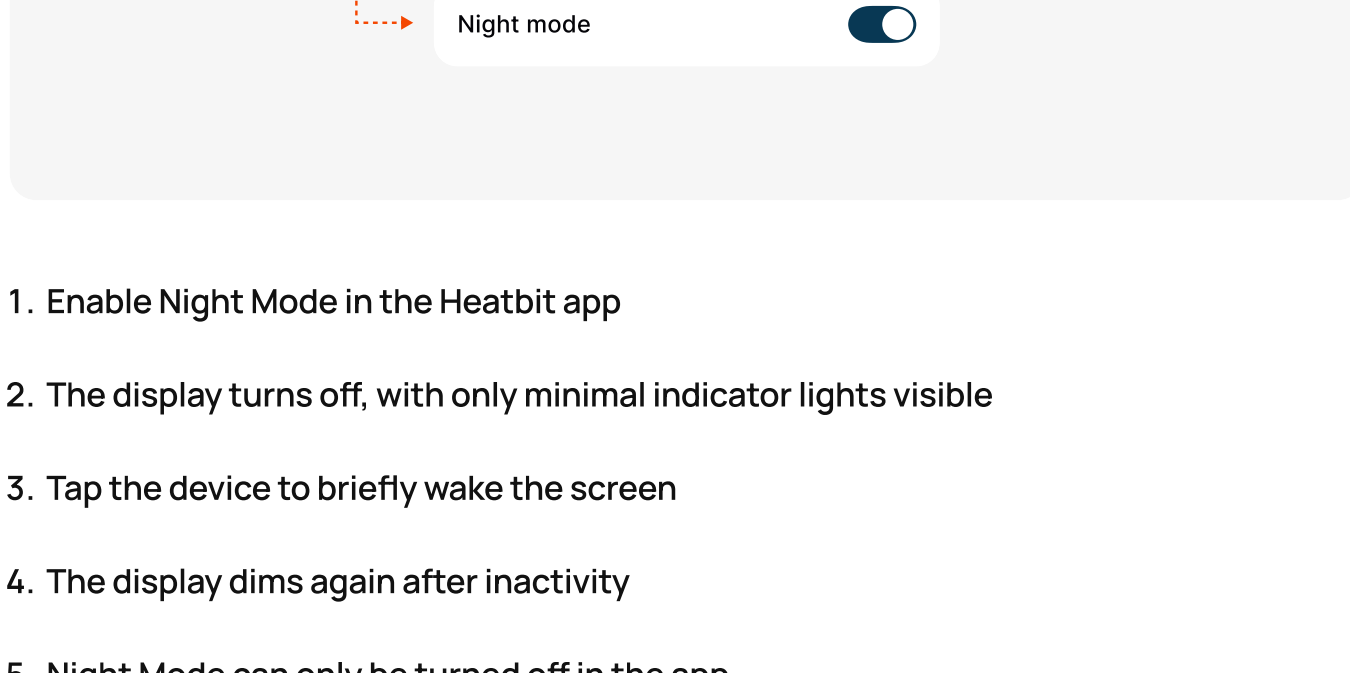

Rapidly warms the room when you need more heat fast. Fan noise may briefly increase while the temperature rises

5. Auto

Designed for everyday use. Set your desired temperature and Maxi Pro automatically adjusts to keep the room comfortable and balanced

6. Light

A gentle, steady warmth with minimal sound – ideal for calm spaces or extended use

Indicators

1. Air quality indicator

- Green (0–20): Air quality is good
- Yellow (15–45): Moderate air quality
- Red (>45): Air quality is poor

2. Temperature and Air Quality Readout

Displays real-time temperature or air quality values so you're always informed at a glance

3. Heating indicator

Glow red when heating is active

4. Mining indicator

Glow when your miner is on

5. Solo mining

Shows when the device is running in solo (lottery) mode

6. App control

Lights up when the device is being controlled via the Heatbit app

7. Wi-Fi connection

Glow when Maxi Pro is connected to Wi-Fi

8. Error notification

Alerts you if the device requires attention

9. App Alert

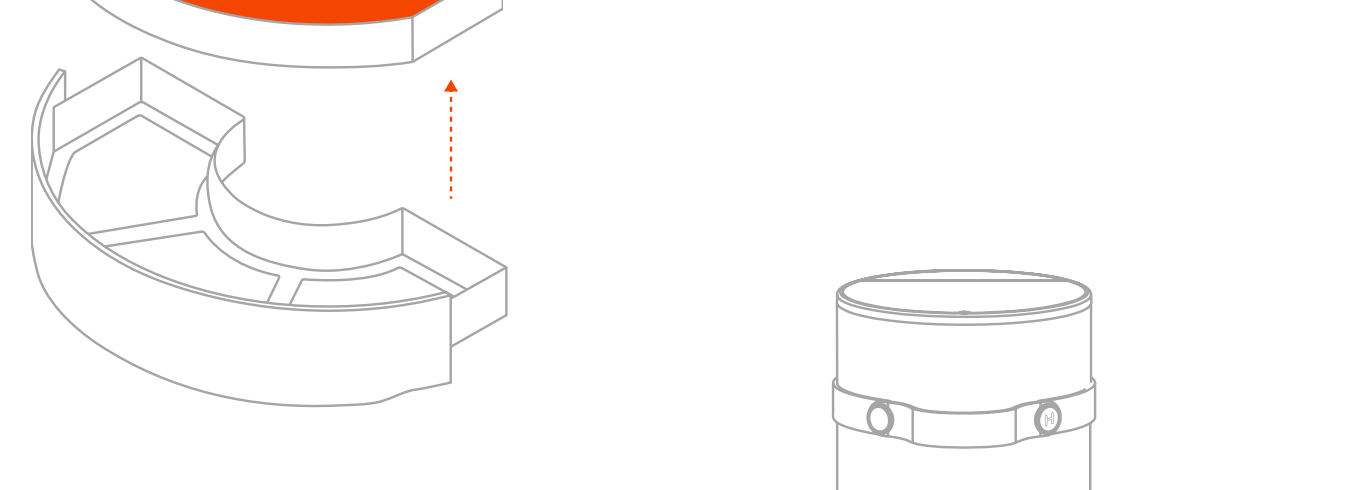

Indicates notifications or messages in the app

10. Filter Change Required

Reminds you when it's time to replace the air filter

Night mode

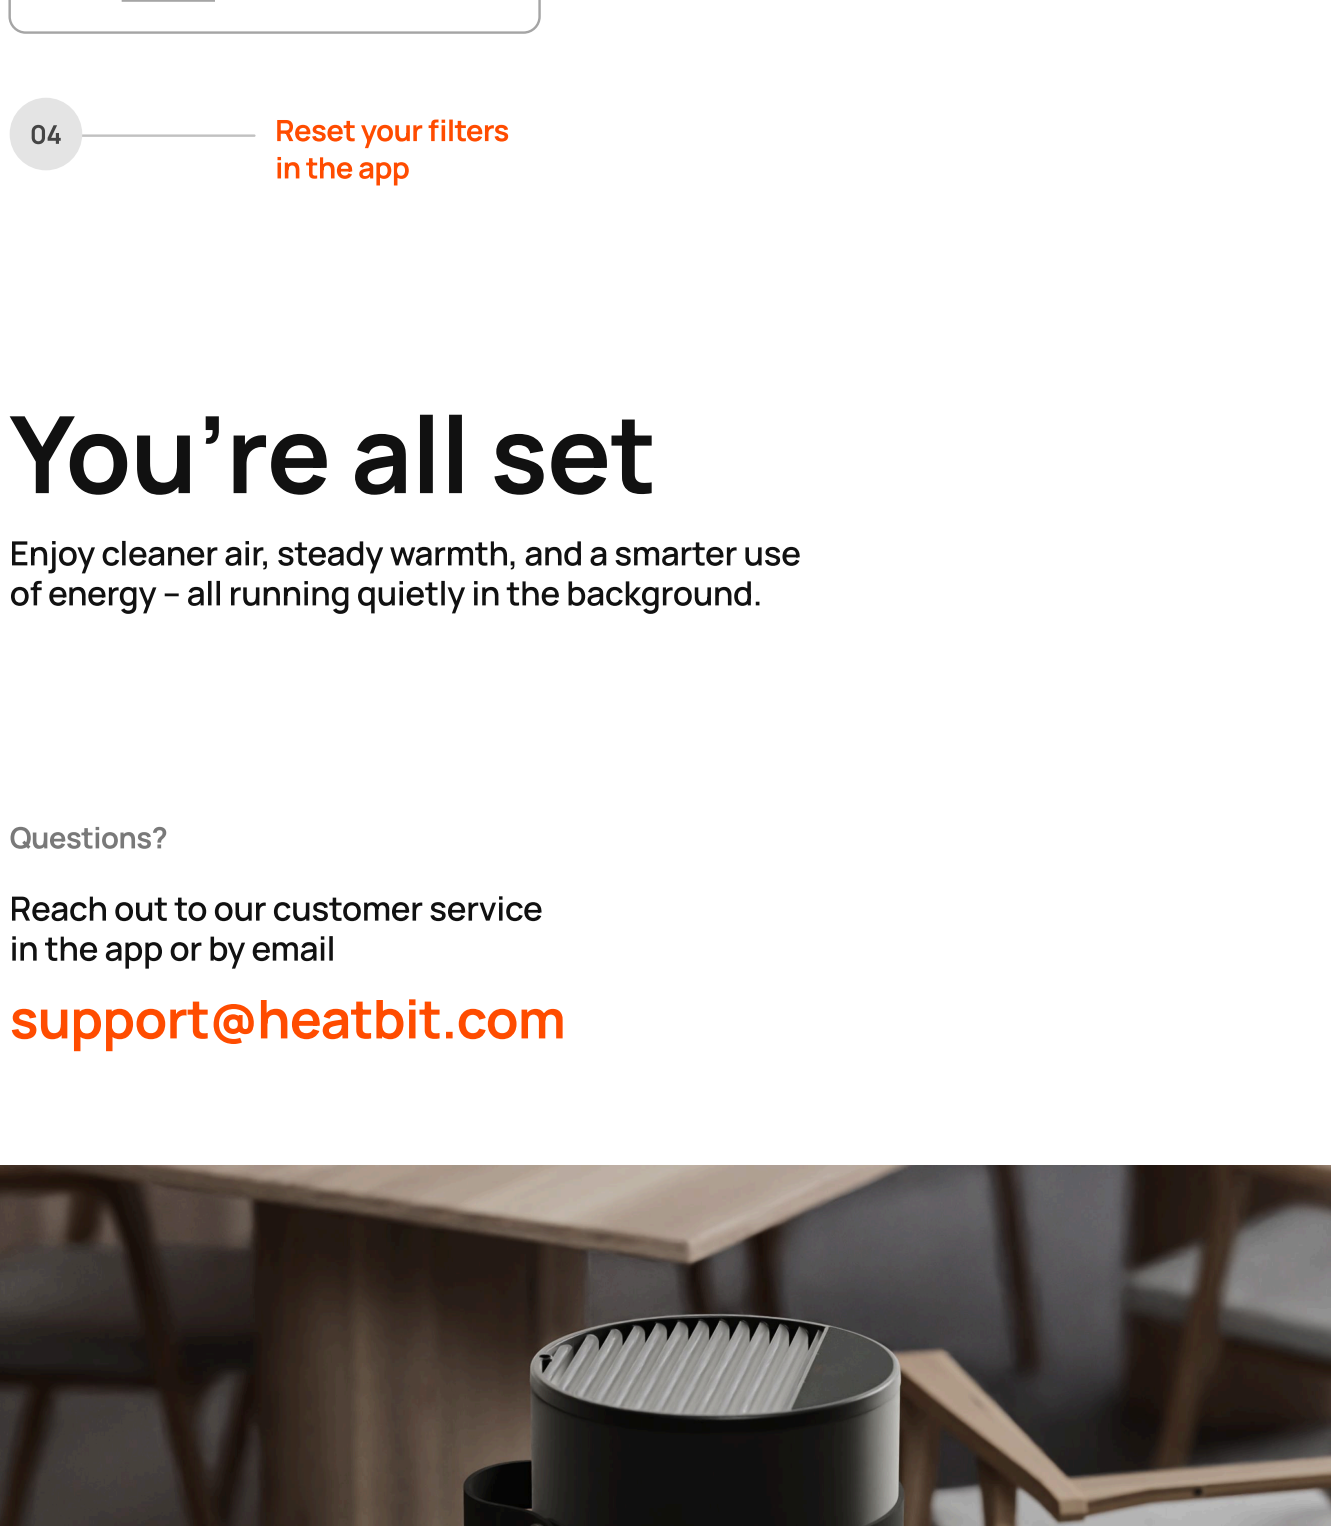

You can switch your device to Night Mode anytime to reduce light output for distraction-free comfort.

Filter replacement

Replace the HEPA air filters every 3–6 months, when notified in the app.

Filters do more than clean the air – they protect internal components from dust, helping Maxi last longer and perform reliably.

You're all set

Enjoy cleaner air, steady warmth, and a smarter use of energy – all running quietly in the background.
